RELEVANT PROJECTS

myFlix, Movie Application

Nov 2021– Feb 2021

CareerFoundry

- Applied MERN stack to build a movie database application in which users can sign up, update their personal information, and create a list of their favorite movies.
- Implemented flux design pattern in front-end application using React Redux library.
- Customized front-end by using state routing to navigate between views and share URLs and also used Bootstrap as UI library for styling and responsiveness.

meet, Event Application

Feb 2021– Apr 2021

CareerFoundry

- Applied a TDD approach to create a serverless, progressive web application that displays upcoming events in a given city by fetching data from Google Calendar API.
- Incorporated data visualization by using Recharts library to create a responsive scatterplot and pie chart.
- Used an Object Oriented Programming approach to display error alerts and informational alerts based on user input.

WORK EXPERIENCE

Software Implementation Analyst

Nov 2019 – Present

CORELATION INC.

- Contributed to five successful credit union software conversions by defining data mapping specifications, conducting database configuration, and overseeing client testing and validation.
- Gathered business requirements and provided technical specifications to development team for over 20 custom batch scripts.
- Led first successful external mortgage software conversion and created documentation outlining procedures and best practices for future conversions. (Maybe talk about ACH here? Or collaboration?)

Application Support Analyst

Aug 2017 – Nov 2019

SANDY SPRING BANK

- Performed support duties and maintenance activities for key bank software platforms across various lines of business.
- Gathered requirements and identified needs for initiatives to improve efficiency, productivity, and integrity through the use of applications.
